"All About Agronomy (For Competitive Exams)" is designed to fulfill the requirement of students appearing in different competitive examinations for admission in post graduate studies in different educational institutions as well as recruitment for various posts in different organizations. This book covers almost the entire field of Agronomy comprising agro-meteorology, soil management, tillage, crop management, nutrient management, organic management, water management, dry land agriculture, weed management, agroforestry and experimental statistics.

Each chapter in this book has subjective as well as objective type of questions. The objective part is meant for incubents appearing in competitive examinations and subjective part (question-answer form) is meant for-students appearing in various interviews. To revise and test the entire knowledge acquired in the subject by going through the book, a chapter on revision of questions is also added.

In addition to the above, relevant information about basic knowledge related to agriculture, important formulae for various calculations in the field of Agronomy, common abbreviations, and conversion factors for different units, acronyms, reference books and important websites related to agriculture are appended at the end.

For the students of Agronomy discipline this book will be very useful for preparing them for various competitive examinations.

Table of Contents
