### Blurb

The present book records the deliberations and views expressed by the eminent workers on various burning environmental issues, such as: Conservation of biodiversity, utilization of natural resources, global warming, desertification, population explosion, etc. Also the volume carries lead articles on the themes of National importance, viz., pollution, bio - diversity, wasteland development, remote sensing and environmental law. Contributory research papers presented in the second - half of the book will be useful to the researchers engaged in the development of the subject.
