

Design of Steel Structures Vol.1

Ramchandra & V. Gehlot

ISBN	: 9788172336547	Book Format	: Book
Language	: English	Binding	: Paper Back
Imprint	: Scientific Publishers	Edition	: 1
Pages	: 984	© Year	: 2016
Weight	: 1270 Gms	Trim Size	: 7.5 x 9.75

Print Book : ~~₹650.00~~ **₹585.00** 10%Off

Blurb

Twelfth edition, 2009 of this book is based on IS: 800-2007 and also newly revised IS: 883-1994 (code of practice for timber structures). New code of practice, IS: 800 is likely to be issued soon. It is likely to introduce ``Limit State Design of Steel Structures Authors have distributed the text in thirty four chapters in main text and one chapter `on Location of Shear Centre in Appendix A. Concept of Shear Centre and bending axis is important and significant and essentially needed to understand simple theory of bending and so also unsymmetrical bending. Complete-text has been updated and new matter added (e.g., elastic buckling, inelastic, stability and instability of columns and compression members, torsional-buckling, torsional-flexural buckling, etc.). Behaviour of web-stiffeners and web-panels specially near the end panels, tension-field action has been first time included to familiarise the students with the concept. Durability of steel members have been emphasized phenomenon of corrosion has been distinctly explained.

Table of Contents

PART I. STEEL STRUCTURES

- 1 Introduction
- 2 Loads, Methods of Design, Properties of Steel
- 3 Riveted Connections
- 4 Bolted Connections
- 5 Pin Connections
- 6 Axially Loaded Columns and Compression Members
- 7 Eccentrically Loaded Columns
- 8 Slab and Gusseted Bases for Columns
- 9 Independent and Combined Column Footings
- 10 Tension Members
11. Flexural Strength of Laterally Supported Steel Beams
12. Shear Strength of Steel Beams
13. Stiffness and Deflections of Steel Beams
14. Flexural and Shear Strength of Laterally Unsupported Steel Beams
15. Simple Beam Connections
16. Semi-Rigid Connections
17. Flexural Strength of Plate Girders
18. Shear Strength of Plate Girders
19. Web Splice and Splice in Flange Elements of Plate Girders
20. Welded Joints Subjected to Axial Load
21. Welded Joints Subjected to Eccentric Load
22. Welded Plate Girder
23. Welded Beam Connections
24. Beams Subjected to Unsymmetrical Bending
25. Roof Trusses
26. Round Tubular Structures

PART II. TIMBER STRUCTURES

27. Timber Columns and Tension Members
28. Flexural and Shear Strength of Timber Beams
29. Joints of Timber Structural Components
30. Nailed Joints in Timber

31. Disc Dwoelled Joints and Metal Connectors

32. Timber Roof Trusses

PART III. MASONRY STRUCTURES

33. Masonry Structures

34. Masonry Chimneys

APPENDIX A- Shear Centre in Open-Thin Walled Sections.
