

Handbook of Practical Nematology

[H.K. Bajaj](#) , [R.S. Kanwar](#) & [D.C. Gupta](#)

ISBN	: 9788172336875	Book Format	: Book
Language	: English	Binding	: Paper Back
Imprint	: Scientific Publishers	Edition	: 1
Pages	: 150	© Year	: 2018
Weight	: 270 Gms	Trim Size	: 6.5 x 9.75

Print Book : ~~₹225.00~~ **₹202.50** 10%Off

Blurb

Nematology is the discipline of science that deals with the study of nematodes or roundworms. Current requirements of practical nematological work and unavailability of expertise and studies in this field indicate a dire need to encourage the likes of this book on the neglected groups of organisms. The authors, in the present book, have attempted to cover the practical aspects of Nematology for U.G. and P.G. students, teachers and research workers. Rather than enlisting numerous methods adopted by various workers, an emphasis is given to most commonly used techniques for every exercise. Additionally, to gain in depth knowledge on a particular topic, further readings have been suggested at the end of each exercise. Illustrations have also been given that will help the readers in the identification of common nematode species and disease symptoms caused by them.

Table of Contents

Exercise 1. Collection and preservation of soil and plant samples - Harish K. Bajaj

- Collection of soil samples
- Collection and preservation of plant parts

Exercise 2. Isolation of nematodes from soil and plant parts and their estimation - Harish K. Bajaj

- Isolation and collection of nematodes from soil
- Isolation and collection of active nematodes and cysts
- Isolation and collection of sessile, slow moving or moulting nematodes
- Isolation and collection of nematodes from Plant Parts
- Isolation and collection of migratory endoparasitic nematodes
- Isolation and collection of sedentary endo- and semiendoparasitic forms
- Counting nematode population in suspension

Exercise 3. Preparation of nematode slides for morphology and taxonomic studies - Harish K. Bajaj

- Preparation of temporary mounts
- Killing, fixing and preserving nematodes
- Preparation of permanent yoto mounts
- Preparation of perineal pattern, vulval cone and en face view

Exercise 4. Measurements of nematodes - Harish K. Bajaj

- Measurements with an ocular micrometer
- Measurements with camera lucida
- Measuring nematodes and their body parts

Exercise 5. Identification scheme for common genera of plant parasitic nematodes of India - Harish K. Bajaj

Exercise 6. Identification of common cyst and root-knot nematode species of India - Harish K. Bajaj

- Identification of cyst nematodes
- Identification of Meloidogyne Species

Exercise 7. Identification of host races of important nematode species of India - Harish K. Bajaj

Identification of host races of *Meloidogyne incognita*, *M. arenaria* and *M. javanica*
Identification of host races of *Rotylenchulus reniformis*
Identification of host races of *Heterodera cajani*
Identification of pathotypes of *Heterodera avenae*
Identification of host races of *Heterodera zeae*
Identification of host races of *Globodera rostochiensis* and *G. pallida*

Exercise 8. Life cycle studies of nematodes - Harish K. Bajaj

Embryonic development (Hanging drop method)
Post embryonic development
Variations with other major nematode groups

Exercise 9. Histopathology of nematode infected roots - P.P.S. Baghel

Exercise 10. Pathogenicity trials for plant parasitic nematodes - K.R. Dabur

Exercise 11. Major nematode pests of important crops in India : Morphology, symptomatology and control - Harish K. Bajaj & R.S. Kanwar

Anguina tritici
Aphelenchoides species
Ditylenchus angustus
Heterodera and *Globodera* species
Meloidogyne species
Rotylenchulus reniformis
Tylenchulus semipenetrans
Radopholus similis
Hirschmanniella species
Pratylenchus species

Exercise 12. Crop loss assessment due to nematodes - R.S. Kanwar & Harish K. Bajaj

Estimation of avoidable losses in an infested
Estimation of losses in a geographical area

Exercise 13. In vitro screening of chemicals against nematodes - I.J. Paruthi

Mortality Test
Hatching Test

Exercise 14. Testing of chemicals against plant parasitic nematodes by different methods in pots and field - R.K. Jain

Evaluation of chemicals by seed soaking method for the control of root-knot nematode
Efficacy of chemicals used as seed dressing method for the control of root-knot nematode
Evaluation of chemicals for the control of root knot nematode through bare root-dip method
Evaluation of granular nematicides for the control of root-knot nematode as soil application / nursery bed treatment

Exercise 15. Testing phytotherapeutic substances for nematode control - R.S. Kanwar

Evaluation of plant extracts for their toxicity against root-knot nematode
Evaluation of efficacy of plant parts for root-knot nematode control

Exercise 16. Screening of germplasm for resistance against important phytoparasitic nematodes - R.K. Jain

Meloidogyne species on vegetables and pulse crops
Rotylenchulus reniformis on vegetable and pulse crops
Anguina tritici on wheat
Heterodera avenae on wheat and barley

Heterodera cajani on pulse crops
Tylenchulus semipenetrans on citrus
Radopholus similis on coconut
Ditylenchus angustus on rice

Exercise 17. Field trials on biocontrol agents for the management of phytonematodes - R.K. Walia

Paecilomyces lilacinus
Pasteuria penetrans

Exercise 18. Crop rotation trials for management of plant parasitic nematodes - R.S. Kanwar

Exercise 19. In vitro culturing of plant parasitic and fungivorous nematodes - R. S. Kanwar

In vitro culturing of plant parasitic nematodes
Callus tissue technique
Carrot disc technique
Excised root technique
In vitro culturing of fungal feeding nematodes

Exercise 20. Isolation and culturing of entomopathogenic nematodes - Harish K. Bajaj

Isolation and mass rearing of EPNs in vivo
Collection of adults of EPNs and studies on their life cycles
