Foundation of Mechanical Engineering is solely written with the view to help B.E. I year students to master the difficult concepts. Needless to emphasise, this new book has been designed as a self-learning capsule. With this aim in view, the material has been organised in a logical order and lots of solved problems and line diagrams have been incorporated to enable students to thoroughly master the subject. It is believed that this book, solely for B.E. I year students of all branches of Engineering, will captivate the attention of senior students as well as teachers.
