ISBN	: 9788172337186	Book Format	: Book
		Binding	: Hard Bound
Language	: English	Edition	: 1
Imprint	: Scientific Publishers	© Year	: 2011
Pages	: 411	Trim Size	: 8.75 x 11.25
Weight	: 1620 Gms		

Print Book : ₹4,200.00 ₹3,780.00 10%Off

Blurb

The exercises in this collection are designed for introductory laboratory courses in general plant pathology at the college level. They are aimed at under-graduate students in Plant Science, Biology, Agronomy, Horticulture, Forestry, as well as Plant Pathology and pest Management and many exercises are suitable for graduate courses as well. However, the focus is on developing an experimental as well as observational approach to principles of plant disease development, diagnosis and control - principles that extend beyond the particular organisms used. The Teacher s manual contains information designed to facilitate use of this kit by instructors and teaching assistants who may not be familiar with a particular plant-pathogen system. Included are additional back-ground information for instructors, sources of materials, list of materials needed, step-wise preparation, procedures, suggested schedules for conducting the exercises (including time required), a discussion of expected results, answer to questions and additional references. The listing of sources of material provided in case material is not available from a local source or regular supplier.

Table of Contents

STUDENTS MANUAL

Preface

List of Contributors

1. Use and Care of the Light Microscope
2. Recognition and Terminology of Diseases Symptoms and Signs
3. Isolation of Fungi and Bacteria
4. Diagnosis of Diseases and Proof of Pathogenicity
5. Plant Diseases Diagnosis in Practice
6. Characteristics and Structures of Fungi
7. Root Infection by Phytophthora
8. Damping- off of Seeds and Seedling
9. Soil Fungistasis
10. Pathogen Survival in Soil: Pythium Oospore Dormancy
11. Biological Control of Soilborne Plant Pathogens by Antagonistic
12. Soilborne Fungi: Inoculum Density
13. Population Assessment of Fusarium Spp. in Soil
14. Foliar Infection by Fungi
15. Dissemination of Fungus Spores and Bacterial Cells by Wind and Water
16. Fungicides for the Control of Foliar Infection
17. Race Identification of Wheat Leaf Rust
18. Bacterial Pathogens
19. Crown Gall
20. Frost Injury and Ice Nucleating Bacteria
21. Viruses: Mechanical Transmission and Host Range

22. Insect Transmission of Plant Viruses
 23. Electron Microscopy
 24. Virus Identification by Serology
 25. Study of Plant-Parasitic Nematodes
 26. Root-knot Nematodes: symptoms, Life Stages, and Control
 27. Cyst Nematodes
 28. Foliar Nematodes on Begonia
 29. Physiological Aspects of Plant Diseases
 30. Abiotic Diseases
 31. Disorders Caused by Higher Plants
- Appendixes
