

Biopesticides in Environment and Food Security: Issues and Strategies

[G.S. Dhaliwal](#) , [Opender Koul](#) , [Ram Singh](#) & [S. Khokhar](#)

ISBN	: 9788172337971	Book Format	: Book
E-ISBN	: 9789386347459	Binding	: Hard Bound
Language	: English	Edition	: 1
Imprint	: Scientific Publishers	© Year	: 2012
Pages	: 474	Trim Size	:
Weight	: 1020 Gms		

Print Book : ₹3,950.00 ~~₹3,555.00~~ 10%Off

Individual E Book : ₹5,135.00

Institutional E Book : Price available on request

Blurb

Drivers behind food security and crop protection issues vis-à-vis the food losses caused by pests include rapid human population increase, climate change, loss of beneficial on-farm biodiversity, reduction in per capita cropped land, water shortages, and pesticide withdrawals. Integrated pest management, therefore, becomes a compulsory strategy in agriculture, which offers a toolbox of complementary crop- and region-specific crop protection solutions to address these rising pressures. IPM aims at more sustainable solutions by using complementary technologies and one of them is the use of biopesticides including genetically modified cropping systems. The aim is to reduce pests below economic thresholds utilizing key ecological services, particularly biocontrol systems via semiochemicals, biopesticides, precision pest monitoring tools, and rapid diagnostics. In fact, we are facing twin problems of environment and food security for the expanding population and it is necessary to ensure adequate pesticide-free food. The ecofriendly nature of biopesticide products suggests environment protection and safety for natural enemies and non-target organisms. However, their adoption and use have lagged behind due to certain constraints like variable performance under field situations, lack of quality standards and interest by big industrial houses, and cumbersome regulatory procedures. The present book is an attempt to critically debate over all these issues and suggest a road map for future.

Table of Contents

- 1 Biopesticides: Spring board to environment and food security - G. S. Dhaliwal, Opender Koul, Sucheta Khokhar and Ram Singh
- 2 Attracting predators and parasitoids using herbivore induced plant volatiles (HIPVs) and maximizing their impact with nectar rewards- G. M. Gurr, M. Simpson and S. D. Wratten
- 3 Insect pheromone technology: A vigorous tree of science blessed with a variety of evergreen branches, including nanotechnology - Hans E. Hummel and Detlef F. Hein
- 4 Role of semiochemicals in biopesticide research and pest management - S. Narasimhan, S. Kannan and Sreeraj Gopi
- 5 Deployment of transgenic crops for pest management: Ecological considerations and their biosafety to the environment - H. C. Sharma
- 6 Bacterial toxins and their application in insect pest management - M. Nagesh, Seema Wahab, Saleem Javeed and R. Thippeswamy
- 7 Genetic improvement of bioagents for pest management in agriculture- Mukesh K. Dhillon
- 8 Developments in the genetic improvement of entomopathogenic nematodes- Vikas Jindal, Harit K. Bal, Ruisheng An and Parwinder S. Grewal
- 9 Protease inhibitors as biopesticides: Potential and constraints - Neha Khandelwal, Rakesh S. Joshi, Vidya S. Gupta and Ashok P. Giri
- 10 Botanical biopesticides in pest management: Potential and constraints- Suresh Walia, Deva Kumar and Opender Koul
- 11 Pesticidal plants: A viable alternative insect pest management approach for resource-poor farming in Africa - Philip C. Stevenson, Stephen P. Nyirenda, Brighton Mvumi, Phosiso, Sola, John, F. Kamanula, Gudeta Sileshi and Steven R. Belmain
- 12 Biologically based stored product insect pest management - Thomas W. Phillips
- 13 From the laboratory to field: Entomopathogens, their success and limitations for widespread use - Surendra K. Dara
- 14 Registration related issues in effective use of biopesticides in pest management - O. M. Bambawale and Someshwar Bhagat
- 15 Acarines as biocontrol agents in pest management - Rachna Gulati
- 16 Plant growth promoting rhizomicroorganisms and plant health management - Suseelendra Desai and Y. R. Sarma
- 17 Endophytic fungal entomopathogens in insect pest management systems - V. Ambethgar
- 18 Biofungicides: Current scenario and future prospects in the management of plant diseases - Jaspal Kaur and Rama S. Singh
- 19 Three decades of research on botanical biopesticides in Canada: 1980-2010 - Rita Seffrin and Murray B. Isman
- 20 Biopesticides in Africa: Current status and future potential - S. Facknath and B. Lalljee
- 21 Biopesticides for pest management in Thailand: Prospects and constraints.- Vasakorn Bullangpotti and Opender Koul
