

Combating Desertification Land Degradation and Climate Change: Management of Drylands

[T.S. Chouhan](#)

ISBN	: 9789388043083	Book Format	: Book
E-ISBN	: 9789388043090	Binding	: Hard Bound
Language	: English	Edition	: 1
Imprint	: Scientific Publishers	© Year	: 2018
Pages	: 583	Trim Size	: 6.20 x 9.25 x 3.90
Weight	: 1000 Gms		

Print Book : ~~₹3,250.00~~ **₹2,925.00** 10%Off

Individual E Book : **₹4,225.00**

Institutional E Book : **Price available on request**

Blurb

Although much is known about the processes and effects of desertification, land degradation and climate change, little is understood about the links between them. Less still is known about how these processes are likely to interact in different social-ecological systems around the world, or how societies might be able to adapt to this twin challenge. This book identifies key vulnerabilities to the combined effects of climate change and land degradation around the world. It identifies triple-win adaptations that can tackle both climate change and land degradation, whilst supporting biodiversity and ecosystem services. Desertification, Land Degradation and Climate Change : Assessment, Mitigation and Remediation research results in sustainable land management, land degradation status and mitigation in the world. It includes background chapters with continental and international perspectives dealing with desertification, land degradation and climate change studies. The book assembles various topics of interest for a large audience. They include carbon sequestration and stocks, modern techniques to trace the trends of land degradation, traditional and modern approaches of resource-base conservation, soil fertility management, reforestation, rangeland rehabilitation, land use planning, GIS techniques in desertification risk cartography, participatory ecosystem management, policy analyses and possible plans for action. Various climatic domains in Africa, Asia, Europe and the Americas are covered. The book will be of interest to a variety of environmental scientists, agronomists, national and international policy makers and a number of organizations dealing with sustainable management of natural resources.

Foreword

Dr. J. K. JAIN

Ex. Head, Department of Geography
Jai Narayan Vyas University, Jodhpur

Table of Contents

Table of Contents:

1. Introduction
2. Status of Drylands, Desertification and Land Degradation
3. Integrated Indicators of Desertification and Land Degradation
4. Processes and Causes of Desertification and Land Degradation
5. Consequences of Desertification and Land Degradation
6. Combating Processes of Desertification and Land Degradation
7. Desertification and Land Degradation in India
8. Bio-Diversity in Susceptible Drylands
9. Dryland Plants and Their Uses
10. Carbon Sequestration in Drylands
11. Saline Soils in Drylands

12. Population and Desertification

13. Poverty and Environmental Degradation

14. Programmes for Combating Desertification, Land Degradation and Climate Change
