

## Crop Improvement: Agriculture and Horticulture Crops

**M. Pandiyan**

ISBN	: 9789389832785	Book Format	: Book
E-ISBN	: 9789389832792	Binding	: Paper Back
Language	: English	Edition	: 1
Imprint	: Scientific Publisher	© Year	: 2020
Pages	: 256	Trim Size	: 6.75 x 9.75 x 0.75
Weight	: 446 Gms		
Release	: New		

**Print Book** : ₹275.00 ₹247.00 10.18%Off

### Blurb

The book **Crop Improvement: Agriculture and Horticulture Crops** has been written with covering 33 chapters of Field and Horticultural crops, for the students of all agricultural universities. The undergraduate & post-graduate students of genetics and plant breeding subject of conventional universities of the country will also be benefited with this new type of book. The book covers nearly 32 crops in 33 chapters which includes other breeding aspects.

The book has been written in simple English & short format. This will be useful for student can easily understand the subject in both undergraduate and post graduate level. Additionally, this book also has question with each chapter

Hope this book would be helpful for undergraduates and post graduates students of agriculture especially plant breeding students. This book provides strong knowledge to students for preparing higher studies as well as competitive exams of DBT-JRF, ICAR-NET and ARS exams.

### Table of Contents

Preface

1. Cereals, RICE – *Oryza sativa* L
2. Classification of cultivated rice
3. Methods of rice breeding
4. Cereals: Wheat
5. Cereals:Maize
6. Cereals:Sorghum
7. Cereals: Pearl millet, Finger millet, Minor millets
8. Pulses: Redgram
9. Pulses: Greeengram and Blacgram
10. Pulses: Soybean, Bengal gram
11. Pulses: Cowpea
12. Oilseed: Groundnut
13. Oilseeds: Gingelly, Mustard and Rapeseed
14. Oilseeds: Castor and Sunflower
15. Fibre: Cotton
16. Sugar: Sugarcane
17. Starch: Potato
18. Fumitories: Tobacco
19. Forage grassesand legumes: Guinea grass, Napier, Cumbunapierhybrid, Lucerne Stylosanthes
20. Breeding for sexually propagated horticultural crops-Bhendi, Tomato
21. Breeding for sexually propagated horticultural crops- Brinjal, Papaya
22. Breeding for sexually propagated horticultural crops- Banana
23. Breeding for insect resistance – mechanisms, basis, genetics of insect resistance- suitable breeding methods- merits and demerits of resistance breeding
24. Breeding for disease resistance –horizontal and verticalresistance-Gene for gene hypothesis – mechanisms, genetics of disease resistance
25. Suitable breeding methods for disease resistance- exploitation of vertical resistance in plant breeding- multilines, gene pyramiding, gene deployment.
26. Breeding for Abiotic stress – drought – mechanisms, basis, genetics of drought resistance - suitable breeding methods-limitations of drought resistance breeding
27. Breeding for Abiotic stress – salinity and alkalinity
28. Breeding for quality traits- Important quality traits in different crops-nutritional quality of cereals and pulses
29. Genetics of nutritional traits-breeding methods- Breeding for low toxic substances-limitations of breeding for enhanced nutritional quality

30. Hybrid seed production techniques in rice
31. Hybrid seed production techniques in maize
32. Hybrid seed production techniques in redgram
33. Ideotype breeding- main features-difference between traditional and ideotype breeding- - crop ideotypes in rice, wheat,cotton- steps in ideotype breeding- merits and demerits of ideotype bre
