

Plant Biotechnology: A Textbook

S.M. Paul Khurana & Narendra Kumar

ISBN	: 9789390749164	Book Format	: Book
Language	: English	Binding	: Paper Back
Imprint	: Scientific Publishers	Edition	: 1
Pages	: 373	© Year	: 2022
Weight	: 568 Gms	Trim Size	: 9 x 6 x 0.80
Book Type	: Text Book <input type="checkbox"/>		
Release	: New		

Print Book : ~~₹395.00~~ **₹355.00** **10.12%Off**

Blurb

This Textbook deals with Biotechnological tools for plants. It is an attempt to provide the latest information in a comprehensible manner for the UG/PG students of Biotechnology, Botany, and molecular- biology/microbiology. The book is presented as a Text Book to deal with the most recent and relevant scientific advancements in the field of Plant Biotechnology- divided into four units and thirty chapters, because of the needs of the syllabi for students of Biotechnology/Botany, dealing with Introduction to Plant Biotechnology, Plant Tissue Culture, Transgenic Plants or Genetic Modification Technology, and Industrial and Agricultural Applications as well as Annexures I and II covering practical ELISA and PCR. The chapters are written impeccably for providing up-to-date knowledge of the subject to the students. The text is presented in a manner that enhances the subject's readability and also makes it interesting. Different issues and levels of difficulty in the subject have been dealt very carefully for the target audience in mind i.e. as an effective teaching tool by compiling it in a systematic way that can be learned efficiently, including many aids like Photographs, Figures, Tables, etc to make the subject interesting and learning to be quite easy and enjoyable.

Table of Contents

UNIT 1/1

Introduction of Plant Biotechnology

1. 1. Introduction: What is Biotechnology
2. What is Plant Biotechnology?
3. Definition of Plant Biotechnology
4. Status of Plant Biotechnology in India
5. Background information on Plant Biotechnology-Contributing to sustainable agriculture, Benefitting the Environment
6. Exercises
7. Bibliography

UNIT 1/2

2. 1. Current scenario of Biotechnology in Developing countries,
2. Importance of Biotechnology for India
3. Up-coming Biotechnology era;
4. Exercises;
5. Bibliography

UNIT 2/3

Plant Tissue Culture

3. 1. What is Plant tissue culture
2. Brief History of plant tissue culture,
3. Important developments in Tissue culture
4. Regeneration pathways
5. Choice of explants

6. Applications of Plant Tissue Culture
7. Exercises
8. Bibliography
4. Basic requirements
 1. Laboratory organization and
 2. Tissue culture Lab equipment
 3. Exercises
 4. Bibliography
5. Culture Media
 1. Some important types of culture media and their composition
 2. Important constituents of culture media
 1. Organic supplements
 2. Inorganic nutrients
 3. Carbon and Energy sources
 4. Hormones and their roles
 5. Gelling agents and their source,
 6. Other organic extracts
 7. Exercises
 8. Bibliography
6. Aseptic Conditions-Measures to be taken for maintaining asepsis during tissue culture;
 1. Aseptic techniques Introduction
 2. Taking personal precautions
 3. Aseptic Technique for Cell Culture
 4. (i) Contaminants,
 - A. Bacteria, fungi, yeast, virus, and insects
 - B. Initial Contaminants
 - C. Latent Contamination
 - D. Introduced Contamination
 - E. Detection of Contaminants
 - (ii) The Transfer Hood Laminar airflow hoods
 - (iii) Sterilization and Use of Supplies and Equipment:
5. More Measures
6. Exercises
7. Bibliography
7. General techniques of Plant tissue culture
 1. What is micropropagation
 2. Advantages, and
 3. Disadvantages
 4. Selection and sterilization of explants
 5. Preparation and sterilization of culture medium
 6. Exercises
 7. Bibliography
8. Cellular Totipotency
 1. Definition
 2. Expression of Totipotency
 3. Totipotency in different plant parts
 4. Application of Totipotency
 5. Exercises

5. EXERCISES

6. Bibliography
9. Cell Differentiation
 1. Introduction
 2. Types of Differentiation
 1. Cytodifferentiation; Factors affecting cytodifferentiation
 2. Organ Differentiation; Factors affecting organ differentiation
 3. Embryonic differentiation Factors affecting embryo differentiation
 4. Exercises
 5. Bibliography
10. Some popular methods in Plant Tissue culture
 1. Cell culture
 2. Callus culture
 3. Suspension culture
 4. Root culture
 5. Shoot culture
 6. Protoplast culture
 7. Haploid production
 - (i) Androgenesis
 - (ii) Gynogenesis
 8. Embryo culture and Rescue
 9. Endosperm culture (Triploid Production)
 10. Exercises
 11. Bibliography
11. Tissue Culture (Miscellaneous)
 1. Cybrids.
 2. Cryopreservation and
 3. Germplasm conservation
 4. Exercises
 5. Bibliography
12. Somaclonal variation
 1. Advantages
 2. Disadvantages
 3. Exercises
 4. Bibliography
13. Plant viruses
 1. History and structure
 2. Transmission of plant viruses
 3. Translation of plant viral proteins
 4. Well understood plant viruses
 - 4.1. TMV
 - 4.2. Cauliflower mosaic virus
 5. Exercises
 6. Bibliography

UNIT 3/14

Transgenic Plants Technology

14. Plant's secondary metabolism
 1. History

- 2. Primary vs. Secondary Plant Metabolism
- 3. Types of Secondary Metabolites in plants
 - 3.1 Atropine
 - 3.2 Flavonoids
 - 3.3 Cyanogenic glycoside,
 - 3.4 Phytic acid
 - 3.5 Gossypol
 - 3.6 Phytoestrogens
 - 3.7 Carotenoids
- 4. Exercises
- 5. Bibliography
- 15. Genetic Transformation
 - 1. History
 - 2. Definitions
 - 3. Natural competence and transformation
 - 3.1 Natural transformation
 - 3.2. Transformation, as an adaptation for DNA repair
- 4. Methods and mechanisms of transformation in laboratory
 - 4.1 Bacterial
 - 4.2 Yeast
 - 4.3 Plants
 - 4.4 Animals
- 5. Practical aspects of transformation in molecular biology-
 - 5.1 Selection and screening in plasmid transformation;
- 6. Exercises
- 7. Bibliography
- 16. *Agrobacterium tumefaciens*
 - 1. Conjugation
 - 2. Method of infection
 - 2.1. Formation of the T-pilus
 - 2.2. Transfer of T-DNA into the plant cell
 - 3. Genes in the T-DNA
 - 3.1. Hormones
 - 3.2 Opines
 - 4. Biotechnological uses
 - 5. Natural genetic transformation
 - 6. Disease Cycle
 - 7. Disease Management
 - 8. Exercises
 - 9. Bibliography Contents xi
- 17.
 - 1. Markers, Genes & Expression
 - 2. Marker genes,
 - 3. Reporter gene
 - 4. Transformation and transfection assays
 - 5. Gene expression assays
 - 6. Exercises

7. Bibliography

18. Vector (molecular biology)

1. Characteristics

1.1 Plasmids

1.2 Viral vectors

1.3 Artificial chromosomes

2. Transcription

3. Expression

3.1 Prokaryotes expression vector

3.2 Eukaryotes expression vector;

4. Features Vector (molecular biology)

5. Exercises

6. Bibliography

19. Plant transformation vectors.

1. Steps in plant transformation

2. Plasmid selection

3. Plasmids: Definition Types, and Replication

4. Exercises

5. Bibliography

20. Methods of Gene Transfer in Plants

1. Vector-mediated gene transfer

2. Direct or vector less DNA transfer

3. Exercises

4. Bibliography

321. 1. Genetically modified crops

1.1 Nature and traditional agriculture,

1.2. Direct manipulation

2. Methods

3. Types of modifications

3.1 Transgenic

3.2. Cisgenic

3.3 Subgenic

3.4 Multiple trait integration

4. Economics

5. Yield

6. Traits

6.1 Extended shelf life

6.2 Improved photosynthesis

6.3 Improved nutritional value,

6.4 Stress resistance

6.5 Pest resistance,

6.6 By-products

6.7 Bioremediation

6.8. Asexual reproduction

7. Exercises

8. Bibliography

22. Transgenic crops expressing new traits-herbicide tolerance, insects, and diseases

1. Herbicide tolerance
2. Insect resistance
3. Exercises
4. Bibliography

3/23

23.

1. Organic farming,
2. Induced Systemic Resistance (ISR)
3. Plant Protection and Quarantine (PPQ)
4. Exercises
5. Bibliography

UNIT 4/24

24. Industrial and Agricultural Application

1. Therapeutic proteins
2. Oral vaccines
3. Exercises
4. Bibliography

4/25

25. Biotic stress

1. Agriculture
2. Effect on plant growth
 - 2.1 Photosynthesis
3. Response to stress
 - 3.1 Inducible defense responses to insect herbivores
 - 3.2 Inducible defense responses to pathogens
 - 3.3 Cross tolerance with abiotic stress
4. Remote sensing
5. Exercises
6. Bibliography

4/26

26. Abiotic stress

1. Examples
2. Effects
 - 2.1 Benefits
 - 2.2 Detriments
3. In plants
 - 3.1 Salt stress in plants
 - 3.2 Phosphate starvation in plants
 - 3.3 Drought Stress
4. Exercises
5. Bibliography

27. Herbicides

1. History
2. Terminology
3. Mechanism of action
4. Use and application.

5. Health and environmental effects
 6. Resistance
 7. List of common herbicides
 8. Exercises
 9. Bibliography
28. Molecular Farming
1. History
 2. Regulation
 3. Controversy
 4. Exercises
 5. Bibliography
- 29.
1. How Plants Produce the Vaccines of Tomorrow
 2. Types of plants as Biofactories for vaccine/antibody production
 3. Benefits of Using transgenic plants for vaccine production
 4. Procedure for developing plantderived vaccines
 5. Exercises
 6. Bibliography
30. Ethics and transgenic crops
1. Risks, benefits, and impacts on society and the environment
 2. Transgenics and human hunger
 3. Transgenics and the environment
 4. Transgenics and human health
 5. Transgenics, socio-economic impact, and distribution of benefits
 6. Fundamental ethical concerns
 7. Exercises
 8. Bibliography

Annexure 1 ELISA Contents

1. Introduction to ELISA
2. Principle of ELISA
3. Types of ELISA
 - 3.1 Direct ELISA
 - 3.2 Sandwich ELISA
 - 3.3 Competitive ELISA
 - 3.4 Reverse ELISA
4. Applications of ELISA in plant virus detection.
5. Exercises
6. Bibliography.

Annexure 2 Polymerase chain reaction Contents

1. Introduction to Polymerase Chain Reaction
2. Principles of PCR
3. The procedure of PCR
4. Applications of PCR
 - 4.1 In Selective DNA isolation
 - 4.2 In Medical and diagnostic applications
 - 4.3 In Infectious disease applications
5. PCR Types
6. Exercises

7. Bibliography
