Dendrology is a science all about trees and other plants that have woody structures. It is the scientific study of morphological characteristics of woody plants, their relationship, biological characteristics, ecological requirements, distribution, variability and economic importance. This book is a compilation of existing literature, field visits, and interactions with renowned personalities working in the similar field. We have attempted to cover Dendrology syllabus for UG Forestry as per the recommendations of the Fifth Deans Committee Report, ICAR. This book may assist students preparing for the ASRB scientist, NET exam, ICFRE scientist exam and entrance exams for higher studies.
