Print Book : ₹2,250.00

Individual E Book : ₹2,925.00

Institutional E Book : Price available on request

Blurb

This irrigation and drainage paper is intended to provide guidance to national planners and decision-makers, agricultural and municipal managers, field engineers and scientists, health and agricultural field workers, wastewater treatment plant operators and farmers. Consequently, it covers a broad range of relevant material, some in considerable depth but some more superficially. It is meant to encourage the collection, treatment and use of wastewater in agriculture in a safe manner, with maximum advantage taken of this resource. Informal, unplanned and un-organized waste water use is not recommended, nor it is considered advisable from the health or agricultural points of view.

Table of Contents

1. WASTEWATER CHARACTERISTICS AND EFFLUENT QUALITY PARAMETERS
 - 1.1 Introduction
 - 1.2 Characteristics of Wastewaters
 - 1.3 Quality Parameters of Importance in Agricultural Use of Wastewaters
2. WASTEWATER QUALITY GUIDELINES FOR AGRICULTURE USE
 - 2.1 Introduction
 - 2.2 Human Exposurer Control
 - 2.3 Effluent Quality Guidelines for Health Protection
 - 2.4 Water Quality Guidelines for Maximum Crop Production
 - 2.5 Health Protection Measures in Aquacultural Use of Wastewater
3. WASTEWATER TREATMENT
 - 3.1 The Problem
 - 3.2 Conventional Wastewater Treatment Processes
 - 3.3 Natural Biological Treatment Systems
4. AQUIFER RECHARGE WITH WASTEWATER
 - 4.1 Principles
 - 4.2 Operations
 - 4.3 Effects
5. IRRIGATION WITH WASTEWATER
 - 5.1 Conditions for Successful Irrigation
 - 5.2 Strategies for Managing Treated Wastewater on the Farm
 - 5.3 Crop Selection
 - 5.4 Selection of Irrigation Methods
 - 5.5 Field Management Practies in Wastewater Irrigation
 - 5.6 Planning for Wastewater Irrigation
6. AGRICULTURAL USE OF SEWAGE SLUDGE
 - 6.1 Characteristic of Sewage Sludge
 - 6.2 Sludge Treatment
 - 6.3 Sludge Application
 - 6.4 Effects of Sludge on soils and crops
 - 6.5 Planting, Grazing and Harvesting Constraints
 - 6.6 Environmental Protection
7. WASTEWATER USE IN AQUACULTURE
 - 7.1 Biota in Aquaculture Ponds
 - 7.2 Technical Aspects of Fish Culture
8. ECONOMIC, INSTITUTIONAL AND POLICY ISSUES
 - 8.1 Economic and Financial Implications

8.2 Institutional Organization
8.3 Policy Issues
9. WASTEWATER USE CASE STUDIES
9.1 Advanced Wastewater Treatment: California, USA
9.2 Wastewater Treatment in Stabilization Ponds: A1 Samra, Jordan
9.3 Soil-aquifer Treatment: Arizona, USA
9.4 Wastewater Treatment and Crop Restriction: Tunisia
9.5 Wastewater Treatment and Human Exposure Control: Kuwait
9.6 Crop Restriction for Wastewater Irrigation: Mexico
9.7 Wastewater Use in Aquaculture: Calcutta, India
