The purpose of this guide to bring forward the reclamation s methodology for concrete repair. For many year, the Bureau of Reclamation (Reclation) has published the Concrete Manual. Reclamation operates and maintains a water resource infrastructure, located primarily in the harsh climatic zones. It has become apparent that there is need for modernization and expansion of the information on the methods, materials, and procedures of concrete repair. The guide contains the expertise of numerous individuals who have directly assisted the author on many concrete repair projects or freely shared their concrete repair knowledge whenever requested. Some of the material in this guide originated in the various editions of Reclamations Concrete Manual. All efforts have been made by the author to bring the guide up to the level of students of UG/PG and teachers as well.

Table of Contents

Chapter I - Repair of Concrete :

1. Introduction, 2. Maintenance of Concrete, 3. General Requirements for Quality Repair

Chapter II - A concrete Repair System :

4. Determine the Cause(s) of Damage, 5. Evaluate the Extent of Damage,
6. Evaluate the Need to Repair, 7. Select the Repair Method, 8. Prepare the Old Concrete for Repair
9. Apply the Repair Method, 10. Cure the Repair Properly,

Chapter III - Causes of Damage to Concrete :

11. Excess concrete Mix Water, 12. Faulty Design, 13. Construction Defects
14. Sulfate Deterioration, 15. Alkali-Aggregate Reaction,
16. Deterioration Caused by Cyclic Freezing and Thawing, 17. Abrasion-erosion Damage,
18. Cavitation Damage, 19. Corrosion of Reinforcing Steel, 20. Acid Exposure, 21. Cracking
22. Structural Overloads, 23. Multiple Causes

Chapter IV - Standard Methods of Concrete Repair :

24. Surfae Grinding, 25. Portland Cement Mortar, 26. Dry Pack and Epoxy-Bonded Dry Pack
27. Preplaced Aggregate Concrete, 28. Shotcrete, 29. Replacement Concrete
30. Epoxy-Bonded Epoxy Mortar, 31. Epoxy-Bonded Replacement Concrete, 32. Polymer Concrete
33. Thin Polymer Concrete Overlay, 34. Resin Injection,
35. High Molecular Weight Methacrylic Sealing Compound, 36. Polymer Surface Impregnation
37. Silica Fume Concrete, 38. Alky-Alkoxy Siloxane Sealing Compound

Chapter V - Nonstandard Methods of Repair :

39. Use of Nonstandard Repair Methods
