Table of Contents

- Foreword
- Acknowledgements
- Acronyms, Abbreviations and Definitions
- Overview of this Training Manual and how to use it
- How to use this Manual

Section 1

HOW TO DELIVER TRAINING ON POSTHARVEST HANDLING AND STORAGE

Contents

Section 1- How to deliver training on Postharvest handling and Storage

- 1.1 Why is PHHS training needed?
- 1.2 The envisaged PHHS training process
- 1.3 Quick tips for good postharvest handling and storage training
- 1.4 Planning the training
- 1.5 Characteristics of good farmer trainers
- 1.6 Effective training approaches
- 1.7 Training materials
- 1.8 Evaluation of learning
- 1.9 Scaling out and scaling up the learning
- 1.10 Follow up

Bibliography

Section 2

HOW TO GET HIGH QUALITY GRAIN ON-FARM

Contents

Section 2- How to get high quality grain on-farm

Training posters – Good Quality Grain for Better Markets

- 2.1 Encouraging farmers to produce high quality grain for a higher income
- 2.2 Preparing for the new harvest
- 2.3 harvesting on time

- 2.4 Harvesting the crop
- 2.5 Transporting the crop from the field to the homestead
- 2.6 Dry the grain
- 2.7 Shelling/threshing the grain
- 2.8 Cleaning the grain
- 2.9 Ensuring good storage of grain at home
- 2.10 Moving the grain to the collection point

Section 3

HOW TO MAINTAIN GOOD QUALITY GRAIN AT THE FIRST COLLECTION POINT

Contents

Section 3- How to maintain good quality grain at the first collection point Training poster – Management of the Grain Collection Point

- 3.1 What the Collection Point staff should do
- 3.2 Main feature of the Collection Point
- 3.3 Preparation for receiving grain in store
- 3.4 Inspecting grain for quality and weight at entry into store
- 3.5 How to place grain in the bag store
- 3.6 How to keep a check on the number of bags in the store
- 3.7 Cleaning and sorting grain that is below quality
- 3.8 Bagging grain (weighing, filling, stitching)
- 3.9 Routine cleaning of the store
- 3.10 Routine inspection of the grain
- 3.11 Routine inspection of the store structure
- 3.12 What to do if a fumigation is needed
- 3.13 Transporting grain to a warehouse (loading, unloading, cleanliness of vehicles)

Section 4

HOW TO MAINTAIN GOOD GRAIN QUALITY IN A WAREHOUSE

Contents

Section 4. How to maintain good grain quality in a warehouse

- 4.1 Managing grain quality
- 4.2 Maintaining the store exterior and the area around it
- 4.3 Maintaining the store interior
- 4.4 How and where to build bag stacks
- 4.5 Ensuring good store hygiene
- 4.6 Routine inspection of the store and bag stack surfaces
- 4.7 Using stock cards
- 4.8 Receiving grain into store
- 4.9 Dealing with damaged grain
- 4.10 Discharge of grain from store

Section 5

GENERAL PRINCIPLES OF GRAIN QUALITY MANAGEMENT

Contents

Section 5- General Principles of Grain Quality management

- 5.1 The meaning of grain quality grades and standards and why we have them
- 5.2 How Farmers' Organisations can control the grain quality they receive
- 5.3 How inspectors should check grain on arrival
- 5.4 how grain is sampled to determine its quality on entry into a store
- 5.5 What causes the postharvest decline of grain quality
- 5.6 Understanding and measuring grain moisture and some other physical factors
- 5.7 The safe- storage moisture content for grain
- 5.8 Stackburn of bagged grain
- 5.9 Measurement of grain moisture content
- 5.10 Weighing grain in and out of stores
- 5.11 The role of the 'Blue Box' for grain quality management
- 5.12 Keeping stock cards
- 5.13 Insect pest control in farm stores
- 5.14 Pest control at Collection Points and in warehouses
- 5.15 What to do about rodents in large stores

Bibliography

SECTION 6

LOCAL GRADES AND STANDARDS

SECTION 7

INSECTICIDES APPROVED FOR USE ON STORED GRAIN

SECTION 8

PHHS CUSTOMISABLE POSTERS
