

Theory, Construction And Calculation Agricultural Machines (Vol. 1-2) (Set)

E.S. Boson, O.V. Verniaev, I.I. Smirnov & E.G. Sultan-Shakh

ISBN	: 9788196229719	Book Format	: Book
Language	: English	Binding	: Hard Bound
Imprint	: United Book Prints	Edition	: 1
Pages	: 476	© Year	: 2023
Weight	: 1.454 Gms	Trim Size	: 6.25 x 9.75 x 2
Book Type	: Reference Book		

Print Book : ₹4,595.00 ~~₹4,136.00~~ **9.98%Off**

Blurb

The Book Presents Technological and Agronomic Requirements of operations performed by machines and units. the technical data for these machines are also given. The Technical data for these machines are also given. The Theory, construction, and calculation of machines and implements are discussed in relation to 1-soil working; 2-Harvesting cereal crops, root crops, and grasses, and 3-post-harvest treatment of grains. Great attention is paid to the theory of tillage tools and soil cutting with blades suited to different soil-climate zones.

Table of Contents

VOLUME ONE

INTRODUCTION

PART ONE. FUNDAMENTALS OF MACHINE DESIGN

CHAPTER I. GENERAL INFORMATION

1. Modern Trends in the Development of Farm Technology
2. Farm Machinery: Characteristics of Work, Tasks and Requirements
3. The System of Machines for Integrated Mechanization of Farm Production
4. Fundamentals of Designing Farm Machinery
5. Economic Considerations for Development of Machines
6. Durability and Service Life of Machines
7. Reliability and Rigidity of Construction
8. Mass and Metal Content of Machines and Methods for Reducing Them
9. Structural Unification and Universalization of Machines
10. Methods Of Hitching Machines and Connecting them to Power

Sources

PART TWO. SOIL-WORKING MACHINES

CHAPTER I. TECHNOLOGICAL PROCESS OF PLOWING

1. Physico-mechanica Properties of Soils
2. Theoretical Principles of the Technological Process of Plowing
3. Principles of the Wedge Theory

4. Working Process of a Moldboard Plow

CHAPTER II. PLOWS FOR PRIMARY AND SPECIAL CULTIVATION

5. Schematic Diagrams of Plows

6. Determination of Basic Parameters

CHAPTER III. WORKING TOOLS OF MOLPROARD PLOWS

7. Plow Cutters

8. Shares

9. Moldboards

10. Construction of the Moldboard Working Surface

11. Working Surfaces of Bottoms for High-speed Plowing

12. Landside of the Bottom

13. Plow Frog

14. Colters

15. Subsoil Cultivators and Notched Bottoms

16. Plow Frames, Safety Appliances and Carrier Wheel

CHAPTER IV. LIFTING AND ADJUSTING MECHANISMS OF PLOWS

17. Mechanisms of Land, Furrow, Rear and Carrier Plow Wheels

18. Automatic Plow Lifting Mechanisms

19. Graphico-analytical Methods for the Calculation of Plow Mechanisms

CHAPTER V. FORCES ACTING ON THE PLOW AND THEIR EFFECT ON PLOW BALANCE

20. Forces Acting on a Plow Bottom

21. Forces Acting on a Trailed Plow and Their Effect on Balance

22. Forces Acting on a Semimounted Plow and Their Effect on Balance

23. Forces Acting on a Mounted Plow and Their Effect on Balance

CHAPTER VI. DRAFT OF PLOWS

24. Resistance Arising during Plowing

25. Plow Efficiency

CHAPTER VII. DISK PLOWS AND DISK HARROWS

26. Types and Purposes of Dish

27. Principles of the Theory of Concave Disk Working Tools

28. Forces Acting on Disk Working Tools

29. Conditions of Balance and Draft Disks

30. Plows with Combined Working Tools

CHAPTER I. MACHINES AND IMPLEMENTS FOR CULTIVATION, GRADING AND COMPACTING OF SOIL

1. Peg-toothed Harrows
2. Disk Harrows
3. Rotary Hoes
4. Graders
5. Rollers

CHAPTER II. CULTIVATORS

6. Agronomic Requirements Imposed on Cultivators
7. Cultivators for Primary Cultivation (Field Cultivators)
8. Inter-row Cultivators
9. Cultivator Working Tools
10. Designing of V-shaped Sweeps
11. Selection of the Apex Angle of Sweep Blade
12. Basic Assembled Units and Mechanisms of Cultivators
13. Determination of the Basic Parameters of Cultivators
14. Construction of Functional and Layout Diagrams
15. Forces Acting on Links of the Lifting Mechanisms of Cultivator Working Tools
16. Calculation of Rigidity of Working Tools

CHAPTER III. MACHINES WITH POWERED WORKING TOOLS

17. Rotary Machines: Agronomic Requirements
18. Rotary Tillers
19. Determination of the Trajectory of Motion of Rotary Tiller Tines
20. Forces Acting on the Rotary Tiller Tines
21. Calculation of Power during Working of a Rotary Tiller
22. Determination of the Main Parameters of a Rotary Tiller
23. Construction of Functional Diagrams of Rotary Tillers
24. Calculation of the Rigidity of Basic Assembled Units and Parts
25. Machines with Working Tools Executing an Oscillatory Motion

CHAPTER IV. MACHINES TO COMBAT WIND EROSION

26. Anti-erosion Cultivators
27. The Spiker
28. The Cultivator Drill

CHAPTER V. COMBINED SOIL-WORKING AND SOWING MACHINES

PART FOUR. MACHINES FOR SOWING, FERTILIZER APPLICATION AND PLANTING

CHAPTER I. GENERAL

1. Methods of Sowing and Planting
2. Agronomic Specifications of Machines for Sowing and Their Classification

CHAPTER II. MACHINES FOR SOWING

3. Fertilizer Grain Drills
4. Machines for Sowing Inter-tilled Crops
5. Grain Hoppers of Machines for Sowing
6. Seed Metering Mechanisms for Cereal Crops
7. Seed Metering Mechanisms for Inter-tilled Crops
8. Seed Drill Tubes
9. Boots
10. Mechanisms to Lift and Adjust the Boot Cutting Depth
11. Drive Mechanisms

CHAPTER III. MACHINES FOR APPLICATION OF FERTILIZERS IN THE SOIL

12. Physico-mechanical Properties and Methods for Application of Mineral Fertilizers
13. Machines for Bulk Application of Mineral Fertilizers
14. Calculation of the Disk-type Fertilizer Metering Unit
15. Calculation of Fertilizer Apparatus of the Centrifugal Type
16. Types and Physico-mechanical Properties of Organic Fertilizers
17. Organic Fertilizer Spreaders
18. Liquid Fertilizer Distributors

CHAPTER IV. PLANTING AND TRANSPLANTING MACHINES

19. Potato Planters
20. Planters: Principle of Operation and Calculation
21. Furrow Opening Working Tools
22. Transplanters
23. Kinematics of Planting Machines

VOLUME TWO

PART FIVE. MACHINES FOR HARVESTING GRASSES FOR HAYMAKING

CHAPTER I. GENERAL INFORMATION

1. Types of Fodder Obtained from Grasses
2. Agronomic Requirements of Haymaking Machines. Forage Harvesting Zones in the USSR
3. Production Processes of Forage Harvesting and Machines for Large-scale Mechanization

CAPTER II. CUTTING EQUIPMENT OF HARVESTING MACHINES

4. Physico-mechanical Properties of Grass and Cereal Stalks
5. Resistance to Cutting
6. Speed of Cutting of Stalks
7. Cutting Angle of the Knife Segment
8. Deflection of Stalks in Cutters
9. Maximum Permissible Feed Rate
10. Stroke Length of Knife

CHAPTER III KNIFE DRIVES

11. Kinematics of the Drive Mechanisms of Cutting Equipment
12. Balancing of Inertia Forces of Cutting Equipment

CHAPTER IV. MOWERS

13. Classification of Mowers
14. Design and Construction of Mowers
15. Fingerless Mowers
16. Mowers with Rotary Cutting Units
17. Mower-Crushers
18. Mower-pick-up Chopper and Loader

CHAPTER V. MACHINES FOR RAKING, TEDDING AND STACKING HAY

19. Dump Rakes
20. Finger-wheel Rakes
21. Tedders
22. Pick-up Stacker

CHAPTER VI. HAY BALERS

23. Classification, Construction and Operation of Hay Balers
24. Binding Mechanisms
25. Baling Force
26. Pressure Distribution in the Baling Chamber
27. Flywheel Design
28. Machines for Loading, Transporting and Storing Hay Bales
29. Working Tools for Hay Briquetting

PART SIX. G W N HARVESTING MACHINES

CHAPTER I. MACHINES FOR HARVESTING GRAINS AND LEGUMINOUS CROPS

1. Agronomic Requirements in Grain Harvesting
2. Production Processes of Grain Harvesting

CHAPTER II. WINDROW HARVESTERS

3. Types of Harvesters and Their Agronomic Requirements
4. Harvesting Units and Design of Their Components
5. Reels
6. Conveyors

CHAPTER III. GRAIN HARVESTING COMBINES

7. Types of Grain Harvesting Combines
8. Attachment of the Reaper to the Thresher of the Combine
9. Production Process of the Self-propelled Combine Harvester Niva
10. Feed Rate of a Combine
11. Pickers
12. Augers

CHAPTER IV. THRESHING UNIT

13. Physical Principles of Threshing
14. Types of threshers and Their Production Process
15. Production Capacity of Threshing Units
16. Grain Separation in Threshing Units
17. Fundamental Equation of the Thresher Drum
18. Selection of Principal Parameters of Thresher Drums
19. Balancing of Thresher Drums

CHAPTER V. STRAW WALKERS

20. Types of Straw Walkers
21. Operating Process of a Twin Crank-shaft Oscillating Section Straw Walker
22. Fundamentals of Separation
23. Motion of Straw over Straw Walker Sections
24. Kinematic Operating Conditions of the Oscillating Straw Walker
25. Selection of Principal Parameters of a Twin-crank-shaft Oscillating Straw Walker
26. Improvement of the Oscillating Straw Walker

CHAPTER VI. GRAIN CLEANERS, FANS AND ELEVATORS

27. Cleaning Equipment and Its Production
28. Calculation of Principal Parameters of the Cleaning Process
29. Air-blown Series Cleaning
30. Classification of Fans
31. Measurement of Pressure of Air Stream Developed by a Fan
32. Fundamental Equation of Fans
33. Design of Fans
34. Blower Fans
35. Elevators

CHAPTER VII. GRAIN STORAGE BINS

CHAPTER VII. GRAIN STORAGE BINS

36. Elements of the Theory of Flow of Bulk Material from Bins
37. Grain Bins of the Combines Niva and Kolos
38. Vibration Generators on Grain Bins of Combines Niva and Kolos

CHAPTER VIII. PROCESS CONTROL MECHANISMS OF GRAIN HARVESTING COMBINES

39. Hydraulic System of Self-propelled Combines
40. Optical Indicators and Audible Alarms on Combines
41. Automatic Feed Regulator of the Combine

CHAPTER IX. MODERN TRENDS IN GRAIN HARVESTING TECHNIQUES

42. Development of Reapers
43. Development of Grain Harvesting Combines

CHAPTER X. MACHINES FOR HARVESTING GRAIN-FREE PART OF THE CROP

44. Methods of Harvesting Straw and Chaff
45. Combine Attachments for Harvest of Straw and Chaff
46. Machines for Piling Straw and Chaff

PART SEVEN. MACHINES FOR CLEANING AND GRADING GRAINS

CHAPTER I. PRINCIPLES OF CLEANING AND GRADING GRAINS

CHAPTER II. PNEUMATIC SYSTEMS

1. Aerodynamic Properties of Grains
2. Classification of Pneumatic Systems of Grain Cleaning Machines
3. Vertical Air Channel
4. Inclined Air Channel
5. Settling Chambers and Dust Collectors

CHAPTER III. SIEVES

6. Design of Sieves
7. Selection of Sieves
8. Theoretical Principles of Operation of Plane Sieves
9. Kinematic Operating Conditions of Sieves
10. Limiting Velocity of Grains over Sieves
11. Factors Affecting Separation of Grains on Sieves
12. Clogging of Sieves
13. Determination of Principal Parameters of Plane Sieves
14. Cylindrical Sieves

CHAPTER IV. GRADERS

15. Grading Equipment
16. Theoretical Principles of Operation of Graders
17. Computation of Principal Parameters of Cylindrical Graders

CHAPTER V. OTHER MACHINES FOR CLEANING AND GRADING GRAINS

18. Frictional Cleaning Devices
19. Vibrating Grain Cleaning Machines
20. Pneumatic Grading Table
21. Magnetic Separator
22. Electric Corona Discharge Separators
23. Machines for Sorting Grains by Color

CHAPTER VI. UNITS AND MACHINES FOR POSTHARVEST PROCESSING OF GRAINS

24. Production Planning and Machine System Requirements for Post-harvest Treatment
25. Arrangement of Grain Cleaning Machines and Grain Cleaning-Drying Assemblies

PART EIGHT. ROOT TUBER HARVESTING MACHINES

CHAPTER I. MACHINES FOR HARVESTING AND POST-HARVEST PROCESSING OF POTATOES

1. Agricultural Produce and Physico-mechanical Properties of Potatoes
2. Potato Harvest Technology
3. Agronomic Requirements of Potato Harvesting Machines
4. Classification, Principles of Operation and Characteristics of Potato Harvesting Machines
5. Cutting Tools
6. Separating Devices
7. Sorting Devices

CHAPTER II. SUGARBEET HARVESTING MACHINES

8. Physico-mechanical Properties of Sugarbeet during Harvest
9. Harvesting Sugarbeet-Agronomic Requirements of Beet Harvesting
10. Classification of Sugarbeet Harvesters
11. Diggers
12. Puller Units
13. Topping Unit
14. Beet Topping Units
15. Sugarbeet Cleaners

PART NINE. MACHINES FOR IRRIGATION AND PLANT PROTECTION

CHAPTER I. MACHINES FOR IRRIGATION

1. Irrigation: Effectiveness and Prospects. Main Trends in the Mechanization of Irrigation

- 2, Sprinkler Irrigation. Agronomic Requirements of Artificial Rain
3. Types of Sprinklers and Their Construction
4. Principal Types of Sprinkler Attachments
5. Determination of Principal Parameters of Sprinkler Nozzles and Machines

CHAPTER II. MACHINES FOR PLANT PROTECTION

6. Methods of Plant Protection
7. Agronomic Requirements of Equipment for Chemical Protection of Plants from Pests, Diseases and Weeds
8. Chemical Seed Dressers
9. Sprayers
10. Aerosol Generators
11. Dusters
12. Fumigators
13. Design Parameters of Principal Working Components of Machines
14. Use of Airplanes for Chemical Plant Protection
