

# METHODS OF ANALYSIS FOR SOILS OF ARID AND SEMI ARID REGIONS

## FAO

ISBN	: 9789388399227	Book Format	: Book
Language	: English	Binding	: Hard Bound
Imprint	: United Book Prints	Edition	: 1
Pages	: 128	© Year	: 2023
Weight	: Gms	Trim Size	:
Book Type	: Reference Book <input type="checkbox"/>		

**Print Book** : ₹1,795.00 ₹1,616.00 9.97%Off

## Blurb

This book is available describing numerous alternative procedures for soil analysis, and users are often confused in selecting the appropriate methods. This publication aims to establish a middle ground between the so-called "cookbook" and the detailed comprehensive type of manual. In doing so, analytical methods, which have been developed and adapted specially to the particular conditions of these soils, are described. It is particular to students, teachers, researchers, and chemists working in laboratories for providing soil Testing and analytical services to farmers in arid and semi-arid regions.

## Table of Contents

### 1 .Soils of Arid And Semi-Arid Regions

- 1.1 Calcareous Soils
- 1.2 Gypsiferous Soils
- 1.3 Salt Affected Soils

### 2 .Soil Sampling and Preparation

- 2.1 Soil Sampling Tools
- 2.2 Sampling for Soil Fertility Tests
  - 2.2.1 Time of Sampling
  - 2.2.2 Depth of Sampling
  - 2.2.3 Methods of Sampling
- 2.3 Soil Sampling for Soil Survey and Classification Studies
- 2.4 Preparation of Soil Samples
- 2.5 Grinding and Sieving of Soil Samples
- 2.6 Reduction of Sample Size

### 3 .Soil Moisture

### 4 .Soil Texture – Particle Size Distribution

- 4.1 Introduction
- 4.2 Dispersion
- 4.3 Sedimentation
- 4.4 Bouyoucos Method
- 4.5 Gypsum Removal from Soil
  - 4.5.1 Gypsum Removal by Ammonium Oxalate
  - 4.5.2 Gypsum Removal by Hydrochloric Acid
  - 4.5.3 Pretreatment of Soil with BaCl<sub>2</sub> to Coat Gypsum with BaSO<sub>4</sub>
  - 4.5.4 Pretreatment of Soil with BaCl<sub>2</sub> Solution followed by Ethanol

4.5.5 Pretreatment with BaCl<sub>2</sub> Solution (Modified Method)

## **5. Soil Density and Total Pore Space**

5.1 Introduction

5.2 Measurement of Bulk Density

5.2.1 Bulk Density of a Disturbed Soil Sample

5.2.2 Bulk Density of an Undisturbed Soil Sample

5.3 Measurement of Particle Density

5.3.1 The Graduated Cylinder Method

5.3.2 The Volumetric Flask Method

5.4 Calculation of Percent Pore Space

## **6. Analysis of Saturation Paste Extract**

6.1 Introduction

6.2 Preparation of Saturation Paste

6.2.1 Calculation of Saturation Percentage

6.2.2 Determination of Soil pH

6.3 Preparation of Saturation Extract

6.3.1 Determination of Soil Salinity (Electric Conductivity)

6.3.2 Determination of Soluble Sodium and Potassium

6.3.3 Determination of Soluble Calcium and Magnesium

6.3.4 Determination of Carbonate and Bicarbonate

6.3.5 Determination of Chloride

## **7. Calcium Carbonate**

7.1 Determination of Total Calcium Carbonate

7.2 Determination of Active Calcium Carbonate

## **8. Cation Exchange Capacity (CEC)**

8.1 Determination of Cation Exchange Capacity (CEC)

8.2 Determination of CEC in Gypsiferous and Calcareous Soils

8.3 Exchangeable Sodium Percentage

## **9. Soil Gypsum**

## **10. Soil Organic Matter**

10.1 Walkley – Black Wet Combustion Method

## **11. Soil Nitrogen**

11.1 Total Nitrogen (Kjeldahl method)

11.2 Determination of Mineral Nitrogen

11.2.1 Determination of Nitrate by the Phenoldisulfonic Acid Method

11.2.2 Determination of Nitrate by the Specific Ion Electrode

11.3 Extraction of Exchangeable Ammonium

11.3.1 Determination of Ammonium by Indophenol Blue Method

11.3.2 Determination of Ammonium by Specific Ion Electrode

## **12. Soil Phosphorous**

12.1 Fractionation of Soil Phosphorous

12.2 Fate of Applied Phosphatic Fertilizer

12.3 Influence of Soil Parent Materials on the Distribution of the Inorganic P fractions

12.4 Phosphorous Retention

12.5 Iron and Aluminium Amorphous Phosphate in Calcareous Soils

12.6 Determination of Available Phosphorous (Olsen's method)

### **13. Soil Potassium**

13.1 Determination of Available Potassium

13.2 Determination of Fixed Potassium

### **14. Soil Sulphur**

### **15. Gypsum Requirement**

### **16. Soil Micronutrients**

16.1 Iron, Zinc, Manganese and Copper

16.1.1 Iron

16.1.2 Zinc

16.1.3 Manganese

16.1.4 Copper

16.2 Determination of Available Micronutrients

16.2.1 DTPA Extraction Method

16.2.2 Measurement of Element Concentration Using Atomic Absorption Spectroscopy

16.3 DTPA Extractability and Availability for Plant Uptake

### **17. Soil Boron**

17.1 Total Boron by  $\text{Na}_2\text{CO}_3$  Fusion

17.2 Available Boron by Hot Water Extraction

17.3 Measurement of Concentration by Colourimetric Methods

17.3.1 Colour Development – Carmine Method

17.3.2 Colour Development – Azomethine-H Method

### **18. Soil Molybdenum**

### **19. Soil Selenium**

### **20. Potentially Toxic Elements - CD, CR, NI AND PB**

### **21. Identification Of Clay Minerals By X-Ray Diffraction (XRD)**

References

List of Tables

Table 1. Chemical characteristics of saline, non-saline sodic and saline-sodic soils

Table 2. Electrical conductivity values for different  $\text{CaSO}_4$  concentrations in water

Table 3. Effect of pretreatments on the d-spacing of selected clay minerals

List of Figures

Figure 1. Sampling pattern for fertility test in a non-uniform land

Figure 2. Sampling-sites selection methods for fertility test

Figure 3. Field datasheet

Figure 4. Reduction of sample size by quartering

Figure 5. Datasheet for the recording of hydrometer readings

Figure 6. Texture triangle showing the percentages of sand, silt and clay in the textural classes

Figure 7. Modified textural triangle for determining soil texture by the feel method

Figure 8. Effect of soil: water ratio and particle size on total gypsum extraction

Figure 9. Identification of kaolinite using its characteristic XRD patterns

Figure 10. Identification of smectite using its characteristic XRD patterns

### **List of Appendices**

Appendix A. List of the atomic weights of the elements

Appendix B. pH indicators

Appendix C. Properties of laboratory materials

Appendix D. Grades of chemicals

Appendix E . Nutrient range in soils, mg/kg (Bashour, 2001)

Appendix F. Temperature factors (ft) for correcting resistance and conductivity data on soil extracts to the standard temperature of 25°C

Appendix G. Conversion factors for SI and non-SI units (Soil Science Society of America Journal)
