The Disaster Risk Management (DRM) Systems Analysis Guide provides a set of tools and methods to assess existing structures and capacities of national, district and local institutions with responsibilities for Disaster Risk Management (DRM) in order to improve their effectiveness and the integration of DRM concerns into development planning, with particular reference to disaster-prone areas, vulnerable sectors and population groups. The strategic use of the Guide is expected to enhance understanding of the strengths, weaknesses, opportunities and threats facing existing DRM institutional structures and their implications for on-going institutional change processes. It will also highlight the complex institutional linkages among various actors and sectors at different levels. Finally, it will help identify gaps within the existing DRM institutions and/or systems including sectoral line agencies that are often responsible for implementing the technical aspects of DRM (e.g. agriculture, water and health sectors).

Table of Contents

INTRODUCTION

MODULE 1: DEFINITIONS AND CONCEPTUAL FRAMEWORK

MODULE 2: PLANNING AN INSTITUTIONAL ASSESSMENT OF DISASTER RISK MANAGEMENT SYSTEMS

MODULE 3: ASSESSMENT OF DISASTER RISK MANAGEMENT SYSTEMS AT THE NATIONAL LEVEL

MODULE 4: ASSESSMENT OF DISASTER RISK MANAGEMENT SYSTEMS AT THE DISTRICT LEVEL

MODULE 5: ASSESSMENT OF DISASTER RISK MANAGEMENT SYSTEMS AT THE COMMUNITY LEVEL

MODULE 6: ANALYSING AND INTERPRETING THE DATA
